

INTERNATIONAL MIND, BRAIN, EDUCATION SOCIETY

MEMBERSHIP APPLICATION

The mission of the International Mind, Brain, and Education Society (IMBES) is to facilitate cross-cultural collaboration in biology, education, and the cognitive and developmental sciences. Science and practice in these fields will benefit from rich, bi-directional interaction. Research can contribute to usable knowledge for education, and practice can help to define promising research directions and contribute to the refinement of testable hypotheses.

To that end our objectives are:

- To improve the state of knowledge in and dialogue between education, biology, and the developmental and cognitive sciences.
- To create and develop resources for scientists, practitioners, public policy makers, and the public.
- To create & identify useful information, research directions, and promising educational practices.
